

High frequency welding machine series

Rotary type

Model: HX-5000A

Output Power: 5000W

Input Power : 8KVA

Power Voltage: 220V/AC Or 380V/AC 50HZ/60HZ

Oscillation frequency: 27.12 MHZ

Working speed: 400-600pcs/ hours

Rectifier: Silicon Diode

Vibration tub: 7T85RB

Gap of electrodes: 250mm

Mechanic movement distance : 160mm

Size of disc : 460*610 mm

Machine size: 1000*670*1650 mm

Packing:

N. W: 400KGS G. W: 430KGS

CBM: 2.1 CMB

Push type

Application

suitable for Blister paper card packaging for stationery packaging, electronics packaging, MP3, MP4, MP5 blister packaging, toothbrush packaging, dental floss packaging, toy packaging, gift packaging, hardware tools packaging, U disk and packaging can also be used in PVC soft lineplastic box molding, plastic welding, PVC processing and other uses

Main feature

1. When used according to the size of plastic packaging products, to decide at one time packaging one or more products
2. The high frequency mold has an upper mold, the two down mold, alternating work and The production may amounts to approximately 3500-4500 / 8 hours
3. The high frequency welding machines using low-loss European standard coaxial high-frequency resonators, high-frequency output power is strong, the most rapid time to make the products welding, greatly improving production yields.
4. The machine is equipped with high-frequency frequency stabilizer and high frequency shielding.

make High-frequency interference to a minimum, to avoid radio interference. And will avoid frequency drift caused by improper operation, damage to electrodes and materials to be minimized, while the warning lights illuminated warning.

5. Easy to operate.

samples

Remark:

- 1. Production Prepared Time: In 10 days after receive the deposit**
- 2. Delivery day: Within 15 days**
- 3. Payment: T/T, 30% of deposit, and the balance pay before deliver.**
- 4. Packing: the standard wooden case for shipment .**
- 5. the price is based on FOB shenzhen price.**

6. After sales service: After sales service shall be done by the buyer. Hengxing machine will provide all kind of technical support to the buyer by telephone, fax or e-mail free of charge. But any service cost to buyer's country is not included. Spare and replace imperfect parts deliver to the buyer within 2 weeks .

7. Guarantee: one year. The supplier can replace only the elements that are imperfect for material or handwork. Replacement is free and ex factory. All imperfect elements have to be delivered within 12 months (carriage paid by the supplier). Guarantee excludes every worn or torn parts. Replacement handwork is excluded and it will be done by the buyer. The supplier is not responsible for any rewards for, damages or last earnings met by buyer. Guarantee is not valid if the machine is used the wrong way or it is not serviced as shown in our technical handbook.
